Lie Detection Reinvented

The goal of credibility assessment is to accurately find the truth. Polygraph has been the standard for a century. EyeDetect offers examiners new benefits — while allowing them to preserve the art of the interview.

EyeDetect®
The eyes don't lie.

EyeDetect®+
Automated Polygraph

Ocular Lie Detector

EyeDetect accurately and efficiently exposes lies by analyzing involuntary eye behavior. Over 600 organizations worldwide use this award-winning solution for screening as well as single-issue testing for investigations.

- √ No sensors or cables attached
- √ Fast Test: 15-30 min.
- √ Accuracy: 86-88%
- √ Unbiased
- √ Fast training: 4 hours
- √ Affordable

Automated Polygraph

EyeDetect+ is the world's first automated polygraph. It combines the benefits of EyeDetect with traditional polygraph by monitoring and recording physiological activity. This means more reliable and accurate test results.

- √ Less invasive: no blood pressure cuff
- √ Fast Test: 20-45 min.
- √ Accuracy: 89-91%
- √ Impartial / automated
- √ Fast training: 4 days
- √ Combines the best of EyeDetect and polygraph*

Used by:

Law Enforcement/Fire | Corrections & Treatment | Government | Investigations | Polygraph Examiners | Private Security | Financial Services | Corporate | Transportation
